DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 25 and 26 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

A single means claim, i.e., where a means recitation does not appear in combination with another recited element of means, is subject to an undue breadth rejection under 35 U.S.C. 112, first paragraph. In re Hyatt, 708 F.2d 712, 714-715, 218 USPQ 195, 197 (Fed. Cir. 1983) (A single means claim which covered every conceivable means for achieving the stated purpose was held nonenabling for the scope of the claim because the specification disclosed at most only those means known to the inventor.). When claims depend on a recited property, a fact situation comparable to Hyatt is possible, where the claim covers every conceivable structure (means) for achieving the stated property (result) while the specification discloses at most only those known to the inventor. See M.P.E.P 2164.08(a).

Claim Rejections - 35 USC § 102

Art Unit: 2664

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1-26 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Takagi et al. (US 6,272,148).

Takagi et al. discloses a scheme for reliable communications via radio and wire networks comprising the following features: generating a compressed TCP/IP header in Fig. 4 representative of a plurality of IP datagrams in accordance with the TCP/IP protocol supported by the gateway 903 in Fig. 2 of the wire network 1101; and transmitting the compressed TCP/IP header to a radio terminal 1508 having a valid command space of compressed TCP/IP header which is less than a full command space of the TCP/IP header, wherein the radio terminal 1508 decodes the compressed TCP/IP header and the corresponding IP datagrams. See column 12-15.

Conclusion

Art Unit: 2664

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Doviak et al. (US 6,198,920) discloses an apparatus for intelligent routing.

Hulyalkar et al. (US 6,198,728) discloses a medium access control protocol.

Doviak et al. (US 5,717,737) discloses an apparatus for transparent communications.

Diachina et al. (US 5,655,215) discloses a method of transmitting messages.
